

IARS

International Anesthesia Research Society

The International Anesthesia Research Society is proud to announce our

2017 IARS Mentored Research Award Recipients

These awards support investigations that will further the understanding of clinical practice in anesthesiology and related science, create future leaders, and prepare applicants to apply for independent research funding. Each award is \$175,000, payable over two years.

Jessica Bowser, PhD

Targeting Epithelial Regeneration for Perioperative Organ Protection

University of Texas Health Science Center at Houston, Houston, Texas

Wayland Cheng, MD, PhD

The Structural Basis of Neurosteroid Binding to the GABA(A) Receptor

Washington University in St. Louis, St. Louis, Missouri
